# Multimedia

- **MMIOMP3**
  - Fixed
- **Mmioflac mmiovorb Update the LIBs**
  - Would be easy if they hadn't changed the names if most of the functions
- **FFMPEG**
  - Try to develop an MMOS2 plugin using it

# Multimedia

- **JPEGIO**

- It apparently doesn't report what it can open at all
- Anyone know how I can get the source?

- **Image by M Kimes**

- Discovered all the proc issues when I updated it
- Will probably compile it into FM/2

# Xcenter Plugins

- Amouse
  - Fixed scroll direction indicator
- REXX plugins
  - Help hook issue
- ISwitcher

# Misc

- eCS tool to fix some disk issues
  - Front end to DFSee
- OpenWatcom
  - Minor fixes and testing for Steve Livine
- Setboot
  - Fixed quoting for backward compatibility with Boot Manager
  - Sorry Roderick

Thanks
