

ISwitcher

Gregg Young
Warpstock Europe 2015

Task Switcher

- Windows list replacement
- Stand alone version
- Xcenter plugin
- Andrei Los was the original author

Popup Window

- Exclude list
- Configurable hotkey
 - Alt + Tab
 - Ctrl + Tab
- Window can be “sticky”
- Hints

Stand Alone

- Taskbar at top or bottom of screen
- Compatible with Xcenter
 - ISwitcher widget can't be installed
- Hide
- Auto resize
- Reduce Desktop
 - Only works if Xcenter hasn't already done I
- Button appearance configurable

Xcenter

- Replaces windows list widget
- Hide/resize handled by Xcenter
- Help available from Xcenter widget menu

Both

- Include the popup window
- Exclude list
 - Separate from popup list
- Icon only or icons with text
- Group
- 3D or flat appearance

Functionality

- Switch tasks
- Minimize Maximize Restore
- Move
- Set priority
- Close Quit Kill
- Run Suspend
 - Stand alone only

Language Support

- German
- Spanish
- Russian
- Czech
- English

Known Issues

- Attempt to restore apps to the virtual Desktop they were minimized from create multiple problems
 - Will be removed for now
- Icon only by process doesn't work with group
 - Return to global option

Known Issues

- Stand alone uses OS2.INI
- INI keys not backward compatible
 - Stored as a struct not individual values
- Icons disappear from grouped apps
 - Depends on the order they are closed in

Planned Enhancements

- Tile Cascade
- Help menu item
 - Stand alone
 - Settings

Thanks

- Code is on netlabs
- Help welcome
